Jason Henson C & H Hog Farms Hc 72 PO Box 10 Mount Judea, AR 72655

Re: Tracking Number ARG590001; AFIN: 51-00164

Dear Mr. Henson:

The application for a modification to your permit coverage was received on January 26, 2015. In accordance with Department policy, your application has been reviewed and determined to be incomplete. There are discrepancies among the submitted NOI and NMP concerning the number of nursery pigs, the acreage, and the total manure, litter, and wastewater generated by the facility. Please see the reverse of this letter for a table outlining the discrepancies. The NMP should be updated to incorporate the values in the most recent NOI. Information to satisfy the deficiencies must be received by the Department no later than **two weeks from the date of this letter** before processing of your application can begin. Failure to submit the required information will result in your application being returned.

If you find that you are unable to meet the deadline, you may request, upon receipt of this letter, in writing a reasonable extension to the deadline above addressed to the Engineering Supervisor of the No-Discharge Section of the Water Division or by email to water-permit-application@adeq.state.ar.us. The Department will inform you whether your request is approved or refused.

Nothing in this request shall preclude the Department from requiring that additional information be submitted in order to complete processing of your application. Performing an activity without sufficient authorization may subject you to an injunction and penalties.

Thank you for your cooperation in this matter. If there are any questions concerning this submittal, please contact me at (501) 682-0653 or by email at vickerson@adeq.state.ar.us.

Sincerely,

Casey Vickerson

Engineer

Water Division, No-Discharge Section

Katherine A. Yarberry, P.

Engineer Supervisor, No-Discharge Section

Water Division

KAY:cv

ce: File (AFIN 51-00164, Tracking Number ARG590001)

Discrepancies:

	Information from NOI and NMP currently on file with ADEQ	Information from Submitted Modification Documents
Number of nursery pigs	4000	750
Available Acreage	630.7*	606.9
Total Waste Generated	2,090,081 gallons	2,614,059 gallons

^{*}According to a response to an inspection report dated September 30, 2013, land application activities have ecased on Field 5 until a map discrepancy is resolved. Therefore, 605.8 acres is the actual acreage available for land application on file with the Department.
